I am a Full-Stack Developer with experience in technologies such as React, Node.js, Express and MongoDB. I have worked on designing applications and websites, focusing mainly on frontend development. I am passionate about creating innovative solutions and learning new technologies. I am always looking to improve my skills and contribute to the success of collaborative projects. I have led projects that have generated significant cost savings and improved efficiency.

PROFESSIONAL EXPERIENCE

TreePilot   **Ica, Perú**
Full-Stack Developer   *July - November 2023*

- I designed the application using Figma, focusing on an intuitive and accessible interface for users.
- I took care of the Frontend with React JS, creating a fluid and fast user experience.
- I developed a simple Backend with Firebase, configuring and administering the database, managing authentications and real-time data storage.
- I integrated the OpenAI API, in order to implement advanced capabilities to the project allowing natural language processing and recommend publications from prompts.
- I implemented the cosine similarity algorithm to measure the relationship between data and improve recommendations, optimizing the interaction with users.

Global Certification   **Ica, Perú**
Full-Stack Developer   *October - December 2024*

- I developed new functionalities for the certification management platform, improving the user experience in programming and issuing documents.
- Implemented database queries to generate certificates dynamically in Excel format, using technologies such as JavaScript and Node.js.
- I solved bugs detected during the grading process in the evaluations, ensuring that the results were accurate and flawless.
- I was in charge of developing a system that allows tutors to create exams with the number of questions they want, improving the flexibility of the platform.

Collie Valley   **Ica, Perú**
Full-Stack Developer   *July - September 2025*

- I developed a dashboard with multiple modules for document management and company exports using technologies such as ReactJS on the frontend and Python with FastAPI on the backend.
- I implemented features such as PDF export from data stored in the database.
- I was responsible for fixing multiple bugs and maintaining the application.
- I developed the design and layout of the platform's UI.

NATIONAL UNIVERSITY OF SAN LUIS GONZAGA   **Ica, Perú**
Systems Engineering   *2024 - 2029*

SAN LUIS GONZAGA NATIONAL SCHOOL   **Ica, Perú**
High School Education   *2019 - 2023*
Honors: Academic Excellence Award, First place in the class of 2023.
